GPIB and Ethernet Interfaces for WaveJet® 300 Series

The WaveJet 300 Series oscilloscope can be fully controlled through a remote connection by using the WJ-GPIB or WJ-LAN interface cards. These cards plug directly into the rear panel option slots of the WaveJet and can be used to transfer waveform data, measurement values, and screen images to your PC. The interfaces also provide control for all the vertical, horizontal, trigger, and other settings remotely.

Communicating with your WaveJet is made simple by using LeCroy's ScopeExplorer or ActiveDSO software utilities. ScopeExplorer provides an easy method to save waveforms, screen images, and setups to your PC without your having to write complicated remote control programs. It also provides the ability to monitor the oscilloscope display on a remote PC by using the auto display refresh function. With ActiveDSO the process of creating automated remote control programs is simplified by a set of predefined functions designed to automatically control the WaveJet remotely, changing all vertical and horizontal settings, trigger conditions, measurement parameters, and more. These functions also allow you to read out measurement values or transfer waveforms

back to the controlling PC. Both ScopeExplorer and ActiveDSO are available for free download from LeCroy's Web site. The WJ-LAN and WJ-GPIB interfaces are automatically recognized by, and are compatible with, all WaveJet oscilloscopes running firmware version 3.06 or greater.

Ordering Information

Product Description	Product Code
GPIB Interface for WaveJet 300 Series	WJ-GPIB
10/100Base-T Interface for WaveJet 300 Series	WJ-LAN

Customer Service

LeCroy oscilloscopes and probes are designed, built, and tested to ensure high reliability. In the unlikely event you experience difficulties, our digital oscilloscopes are fully warranted for three years and our probes are warranted for one year.

This warranty includes:
- No charge for return shipping • Long-term 7-year support
- Upgrade to latest software at no charge
